

BASKET RÔTISSERIE

Rôti-Roaster

FBP5.520

DESIGN

The new generation of "Rôti-Roaster" rotisseries allow professionals an optimal use with energy saving and respect for the environment as they are fully insulated. Highly technological but easy to use, they feature an automatic cooling of the heating turbines at the end of the cooking cycle. All accessories and inside panels are removable for ease of cleaning, while being reliable and meeting safety requirements.

Aware of the energy expense for its customers, Rotisol has implemented an energy saving program on its electrical products. Differences in consumption vary from 25 to 40% compared to competing products, for a faster and more economical performance.

FEATURES

- ☐ Control panel with 6 cooking programs. Pre-heating, alarm at end of cooking cycle and temperature maintenance (+ 145° K).
- ☐ Anti-burns and anti-radiation K.GLASS glass for energy savings (accelerated cooking), mounted on a removable silicone joint.
- ☐ Options: curved anti-burn double glass.
- ☐ Removable drip pan with drainage tap.
- ☐ 2 lights protected by a ceramic glass (flat surface for easy cleaning).
- ☐ Removable planetary central axis.
- ☐ Delivered with 5 baskets (BALD520).
- ☐ Optional: Banner with illuminated "Rotisserie" sign, choice of epoxy finish or all stainless steel.
